The company's core focus is innovation in energy storage technology, with vanadium REDOX flow battery (VRFB) as the technology cornerstone, to create a series of ...

OverviewHistoryDesignEvaluationTraditional flow batteriesHybridOrganicOther typesA flow battery, or redox flow battery (after reduction-oxidation), is a type of electrochemical cell where chemical energy is provided by two chemical components dissolved in liquids that are pumped through the system on separate sides of a membrane. Ion transfer inside the cell (accompanied by current flow through an external circuit) occurs across the membrane while the liquids circulate in their respective spaces.

The development of sPEEK membranes is a remarkable achievement that highlights the potential of flow batteries to support renewable energy integration. However, it is ...

The development of sPEEK membranes is a remarkable achievement that highlights the potential of flow batteries to support ...

Currently, Spain is an avant-garde in energy futures. Since tariffs have been heightened by 22% in the year 2023 and EU green ...

Ever wondered why your neighbor's solar-powered greenhouse uses liquid flow batteries instead of conventional lithium-ion? The secret sauce lies in those mysterious storage containers ...

They developed a flow battery for their project, that could help householders store solar energy more safely, cheaply, and efficiently. This product could retail for far less in ...

The company's core focus is innovation in energy storage technology, with vanadium REDOX flow battery ...

Spanish liquid flow solar container battery

A milestone in this revolution comes in the form of the new system inaugurated at the Son Orlandis photovoltaic power plant in Mallorca: it is the Enel Group's first vanadium flow battery ...

They developed a flow battery for their project, that could help householders store solar energy more safely, cheaply, and efficiently. ...

Silbat's battery stores electricity in the latent heat of fusion of silicon. It uses low-cost and widely available metal-grade silicon.

Currently, Spain is an avant-garde in energy futures. Since tariffs have been heightened by 22% in the year 2023 and EU green regulation is surging by 42% in the year ...
