container itself into a mini ...

With the Rover Li 60A MPPT charge controller, the kit can meet your further power needs by adding more of the same solar panels; for example, a ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.
