-----

The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally. As ...

Thus, in this study, an optimal control approach for ESS located at the connection point of transmission and distribution systems, including further consideration of the loss in ...

This paper comprehensively reviews recent developments in substation environmental control. It explores influential factors such as thermal models and layout effects, and surveys both ...

Aging substations pose a significant vulnerability to today's electrical grid, presenting tangible risks to public safety and reliability. Many of these facilities were designed ...

Utilities need tools and strategies to implement sustainable solutions for substations to ensure communities have uninterrupted electrical service. To bring global energy-related carbon ...

locations for substations are all industrial zones. However, with already existing substations, their industrial appearance can be softened by greening the area around the substation in a natural ...

Implementing energy storage in substations constitutes a significant advancement within the energy landscape that necessitates careful consideration of multiple elements, from ...

Electrical substations will play a critical role in the power grid's transition to clean energy by supporting generation mix changes, along with the related transmission line network upgrades.

The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for

the benefit of the public in ...

In this article, we'll explore a substation engineer's perspective on the best practices for substation design, importance of substation engineering for renewable energy ...

Thus, in this study, an optimal control approach for ESS located at the connection point of transmission and distribution systems, ...

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) ...
