How much does a BMS cost?

Average active BMS price range: \$500-\$2,000. Hybrid BMS - As the name implies, hybrid BMS combines elements of both passive and active systems. This allows optimized functionality per cell at lower costs than purely active BMS. Hybrid systems actively balance while monitoring voltages, while allowing passive shunting on cell voltage thresholds.

What are the different types of BMS?

First, it's helpful to understand the core BMS categories available: Passive BMS - As the most affordable BMS type, these simpler systems conduct basic monitoring of cell voltages and temperatures. When voltage or temperature thresholds are exceeded, passive BMS cuts off charge or discharge to prevent cell damage.

What are the benefits of a BMS?

**Multiple Protection:** This BMS Offers overcharge, over-discharge, short circuit, and overcurrent protection. Includes reverse connection protection to prevent damage from incorrect wiring, ensuring system reliability

**Wide Application:** Inverter BMS Suitable for home energy storage, communication base stations, building energy storage, and backup power.

What is a passive BMS?

Passive BMS - As the most affordable BMS type, these simpler systems conduct basic monitoring of cell voltages and temperatures. When voltage or temperature thresholds are exceeded, passive BMS cuts off charge or discharge to prevent cell damage. Key functions include overcharge protection, undervoltage protection, and balancing cells.
