-----

TEHRAN - Iran is negotiating with several Chinese companies to develop solar power plants and battery energy storage systems (BESS) as part of efforts to boost renewable ...

The Iranian government has unveiled a sweeping energy transition initiative to decouple all state institutions from the national power grid, prioritizing off-grid photovoltaic (PV) ...

This study aims at estimating the rooftop solar power production for Tehran, the capital city of Iran, using a Geospatial Information System (GIS) to assess the big data of city ...

Tehran's recent climate pledge at COP28 commits to 30% renewable generation by 2030. Without robust storage infrastructure, that target's about as reliable as a sandcastle at high tide.

The CEO of Tehran Province Regional Electricity Company announced the construction of three high-capacity solar power plants in areas including Qom province, which ...

Iran is negotiating with several Chinese companies to develop solar power plants and build energy storage systems, a senior official at the state-run Power Generation, ...

Solar energy development in Iran has been progress-ing in recent years, with the government establishing ambitious targets for renewable energy production. As of 2024, Iran had ...

The president emphasized the need for more solar power growth in southern provinces. These regions continue to see increased development, which is driving energy ...

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV

and energy storage, and the promising yet challenging road ahead.

The Tehran project is one of 1,000 distributed solar plants planned under Iran's national 3,000-megawatt renewable energy initiative. The projects are being executed as ...
