Following the workshop, they applied the skills they learned to install a solar-powered street light in a part of the city that was previously unsafe to walk in at night.

In recent months, political instability and lack of fuel have led to widespread protests and roadblocks making access to resources nearly impossible. But, with an average of 8.5 hours of ...

The school"s solar-electric system fills a vital need--powering lights, phone charging, and clean water pumping. With this electricity, students could use computers and ...

As soon as enough money is raised, we get the lights and accessories produced and shipped to Haiti where our team on the ground is ready to install them. Every solar street light can be ...

Three quarters of Haiti"s population does not have access to their national power grid, but solar lamps are helping provide light to people in a nation with severely underdeveloped...

In Canaan, an informal settlement in Haiti of families displaced by the deadly 2010 earthquake, Habitat installed 200 energy-efficient streetlamps in capital-area neighborhoods and now is ...

In Haiti, solar power at a rural school changes the educational landscape, and how residents see their future. It"s 8 p.m. on a Tuesday and the sky is already completely dark--the kind of inky ...

That is why we have adopted a plan to provide 200 solar lamps for 200 children living in the most difficult conditions. Each lamp is a point of light in a suffering world, a point of ...

Something as simple as a solar powered light can open up opportunities for families in Haiti. Without

electricity, children have to study by candlelight ...

In recent months, political instability and lack of fuel have led to widespread protests and roadblocks making access to resources nearly impossible. ...

In Canaan, an informal settlement in Haiti of families displaced by the deadly 2010 earthquake, Habitat installed 200 energy-efficient streetlamps in ...

Something as simple as a solar powered light can open up opportunities for families in Haiti. Without electricity, children have to study by candlelight or kerosene lanterns at night and face ...
