Discover how Tunisia is leveraging solar-powered cooling systems to combat rising temperatures while reducing energy costs. This article explores innovative applications, government ...

In this paper, we present a research project aiming at assessing the feasibility of solar-powered absorption cooling technology under Tunisian conditions.

The research develops a prototype system that responds effectively to variable humidity and temperature across Tunisia--from the humid Mediterranean coast to the dry ...

Air Conditioning in Summer in Tunisia: Combine Cool Comfort and Energy Savings (and Discover the Key Role of Solar Power!) The Tunisian summer, with its long sunny days and rising ...

eco&#176; SOLAR initiatives supercharge to Tunisia's green transition by engineering technologies that support long-term resilience: commercial BESS, solar generators, solar-powered air ...

Abstract: In this work, we study the energy performance of a domestic air conditioner operating by a hybrid PV -Grid source tested in the climatic conditions of Tunis (Tunisia).

As Tunisia faces rising temperatures and energy costs, solar air conditioners emerge as a game-changing solution. This article explores how solar AC systems work, their economic benefits, ...

The demand for cooling continues to increase in line with environmental changes and a greater desire for human comfort. In north Africa and middle eastern countries, and ...

In this paper, we present a solar cooling installation located at the Center of Researches and Energy Technologies (CRTEn), in Bordj-C&#233;dria, Tunisia.
