Led by the University of Manchester, with support from other academic institutions and industry partners, the three-year project aims to develop advanced energy storage ...

UK clean energy company Enviromena will supply green power to The University of Manchester from a newly-commissioned 71-MWp solar photovoltaic (PV) park in Essex, ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

The University of Manchester has made a significant stride towards its goal of achieving zero carbon emissions by 2038 by teaming up with Enviromena, to purchase ...

OverviewHistorySolar potentialRooftop solarLarge-scale solar farmsPlanning considerationsGovernment programmesFutureIn 2006, the United Kingdom had installed about 12 MW of photovoltaic capacity, which represented only 0.3% of total European solar PV of 3,400 MW. In August 2006, there was widespread news coverage in the United Kingdom of the major high street electrical retailers Currys' decision to stock PV modules, manufactured by Sharp, at a cost of £1,000 per module. The retailer also provi...

In the summer half-year from April to September 2016, UK solar panels produced more electricity (6,964 GWh) than did coal power (6,342 GWh); each meeting about 5% of demand.

Imagine a rainy Manchester evening when solar panels stop generating, or a windless week that leaves turbines idle. This is where the Manchester Energy Storage Integrated System ...

From Monday (1 September), The University of Manchester will begin powering its campus with clean,
