-----

The project is an important milestone on the way to a climate-neutral heat supply for Vienna. Once completed, the plant in Vienna's 22nd district will feed into the city's district ...

The first plant is currently under development in Aspern, Vienna. While OMV handles subsurface operations (including deep drilling and thermal water extraction), RED ...

Imagine storing energy as simply as filling a balloon with air--sounds almost too easy, right? That's essentially what Vienna's compressed air energy storage (CAES) project ...

The project is the first to explore the potential of utilizing ATES for district heating network applications in Austria and Central Europe. The results of the project can be used to set the ...

Vienna's commitment to climate neutrality by 2040 has fueled investments in innovative photovoltaic energy storage projects. With rising solar adoption and fluctuating energy ...

The TREASURE project was presented at the Seasonal Large-Scale Heat Storage Systems symposium in Vienna, showcasing groundbreaking demonstrations in underground ...

The first plant is currently under development in Aspern, Vienna. While OMV handles subsurface operations (including deep ...

Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North America leads with 42% market share, ...

The ATES Vienna project heating networks with the aim of designing the first pilot ATES project in Austria. In addition, an identification and characterization of existing resources, their economic ...

With EUR17.3 million from the Innovation Fund, ScaleUp will construct a 20 MW underground thermal energy storage system in Vienna, storing excess summer heat for use in winter.

PDS Timeframe Investment programme description ELENA PDS will be used by Wien Energie to prepare and implement investments for a seasonal heat energy storage system, in ...
